

Lucas Toshio Ito

Biomedical scientist · PhD candidate

lucas.toshio.ito@gmail.com

São Paulo, Brazil

FOCUS	Psychiatric genetics · Suicidality · Polygenic scores · CNVs · Neuroimaging · Bioinformatics
PROFILES	Google Scholar · PubMed · ORCID · GitHub · LinkedIn
LANGUAGES	Portuguese (native) · English (advanced)

RESEARCH PROFILE

Biomedical researcher specializing in psychiatric genetics, with experience in genomics, neuroimaging, polygenic scoring, copy-number variant analysis, and bioinformatics. I am a PhD candidate at the Federal University of São Paulo (UNIFESP) under the supervision of Marcos Leite Santoro and completed a one-year visiting research period at the Icahn School of Medicine at Mount Sinai under the supervision of Niamh Mullins. I serve as a lead genetics analyst for the Brazilian High-Risk Cohort for Mental Health Conditions, integrating genomic, neuroimaging, and psychiatric data. My work emphasizes psychiatric genetics in underrepresented and admixed populations and the study of suicidal thoughts and behaviors across biological levels.

EDUCATION

03/2023–present	PhD, Structural and Functional Biology Psychiatric Genetics Federal University of São Paulo (UNIFESP), São Paulo, Brazil Supervisor: Marcos Leite Santoro Project: Impact of genetic variants on structural neuroimaging: a longitudinal approach in psychiatric disorders.
01/2025–01/2026	Visiting PhD Research Period · Icahn School of Medicine at Mount Sinai New York, United States · Supervisor: Niamh Mullins Project: The role of copy-number variants in suicide attempt and suicidal ideation in the Psychiatric Genomics Consortium. FAPESP-supported international research period completed as part of the UNIFESP PhD training.
03/2018–02/2023	BSc, Biomedical Sciences Federal University of São Paulo (UNIFESP), São Paulo, Brazil Undergraduate project: Polygenic scores and their relationship with multiple mental disorders in the Brazilian population.

RESEARCH EXPERIENCE

03/2023–present	PhD Researcher and Genetics Analyst · UNIFESP / BHRC Lead and contribute to genomic analyses in the Brazilian High-Risk Cohort for Mental Health Conditions. Integrate polygenic scores, common and rare variation, longitudinal phenotypes, cognition, and structural and functional neuroimaging. Develop collaborative projects on suicidality using CNVs, miRNA, neuroimaging, and genetic data.
01/2022–02/2023	Undergraduate Researcher · Psychiatric Genetics, UNIFESP Supervisor: Marcos Leite Santoro Analyzed polygenic scores and multiple psychiatric outcomes in a longitudinal Brazilian cohort of children and adolescents.
03/2022–12/2022	Practical Genetics Intern · Department of Morphology and Genetics, UNIFESP Training in karyotyping, arrays, MLPA, FISH, whole-exome analysis, nucleic-acid extraction, cDNA synthesis, Sanger sequencing, real-time PCR, digital PCR, and liquid biopsy.
06/2018–12/2021	Undergraduate Researcher · Proteomics and Peptidomics, UNIFESP Supervisor: Alexandre Keiji Tashima Proteomic and peptidomic characterization of Nephilingis cruentata spider and Lachesis muta snake venoms using mass spectrometry.

AWARDS AND HONORS

2025	Peter McGuffin Scholarship, World Congress of Psychiatric Genetics.
2025	Reviewers' Choice Abstract, American Society of Human Genetics Annual Meeting.

2023 Travel Award, PGC Trainers Development Program and World Congress of Psychiatric Genetics.
 2023 Best PhD Project, poster category, XXII Congress of the Graduate Program in Functional and Structural Biology.

RESEARCH FUNDING

01/2025–01/2026 **FAPESP 2024/11033-1 · Individual International Predoctoral Fellowship**
 The role of copy-number variants in suicide attempt and suicidal ideation.
 Principal investigator · Mentor: Niamh Mullins

03/2024–02/2029 **FAPESP 2023/05560-6 · Research grant**
 Genetic and epigenetic approaches as predictive models in mental disorders.
 Genetics analyst · Principal investigator: Marcos Leite Santoro

06/2023–02/2028 **FAPESP 2022/15880-5 · Individual Predoctoral Fellowship**
 Impact of genetic variants on structural neuroimaging: a longitudinal approach in psychiatric disorders.
 Principal investigator · Mentor: Marcos Leite Santoro

06/2019–07/2020 **FAPESP 2019/07629-8 · Undergraduate Research Fellowship**
 Complete sequencing of cysteine-rich toxins from *Nephilingis cruentata* spider venom.
 Principal investigator · Mentor: Alexandre Keiji Tashima
